APPENDIX 1

PROCEDURE FOR MOVING SHELVING

PLEASE READ IN FULL BEFORE STARTING THE PROCEDURE

- Before starting to move shelving be clear as to where it is being moved to and plan the shortest route to the new location.
- The procedure should be carried out prior to the start of an event or activity. A minimum of three people should move the shelves. If Hirers move shelving with less than three people this is at their own risk.
- The shelving should be moved lengthways by pushing/pulling on the ENDS only – do not attempt to move the shelves by pushing/pulling from the sides.
- Release the brake levers before you start the move. These are very stiff – use your feet to release them (NEVER your hands) and only when wearing a full shoe, not an open toed sandal.
- Once the shelving is in situ at its new location ensure that the wheels are aligned to the shelving or pointing inwards, ie not jutting out as this can present a trip hazard.
- Apply the brakes as per guidelines above.

The shelving should be returned to its original position at the end of the event/activity following the above guidelines.
